

Usable Art Needed to Create Screen Files:

We primarily use Adobe Illustrator and Photoshop in our art department.

Adobe Illustrator vector art (any version)

- all type MUST be converted to outlines
- Specific colors (PMS) - no CMYK please
- specific imprint sizing or locations noted
- placed images must be embedded or supplied as 300 dpi files (jpg, png, tif, psd)

Photographic Images:

- High Resolution (300 dpi) at actual print size layered photoshop file.
- Color Separated Photoshop DCS files are ideal with PMS colors
- JPG, TIF, PNG, EPS, AI, or PSD are all accepted file types and should be at 300 dpi and actual print size for best results
- Backgrounds should always be on a separate layer when applicable
- Kornit files should follow the same criteria but can also be vector if needed

Additional art charges will be applied to your order if files are not print ready.

If we do not receive correct artwork, production of your order may be delayed and art charges may apply for us to correct the artwork.

Thank you,

Visual Art Department
